

# Product Information Sheet

## Mini Nostalgiedose (digital printing / pad printing)

**small scratches on the tin are production-related and need to be accepted!**

	non-printable area
	visible printing area for pad printing
	visible printing area for digital printing

	<p>The files have preferably been created with Adobe Illustrator (CC), Adobe InDesign (CC) or Adobe Photoshop (CC). In addition, Adobe Acrobat, CorelDraw (11), Macromedia Freehand MX as well as QuarkXPress (8) are possible too.</p>
	<p>Images should have a resolution of at least 300 dpi, logos and other objects of at least 1200 dpi. The best results are achieved with vectorized files.</p> <p>Vectorize all fonts or provide all fonts used (for PC).</p>
	<p>Indicate as CMYK (4c Euroscale), or as special colours (HKS-K or PANTONE® C). No RGB!</p> <p>Printed colours always have a glazed finish. Glazed colours are not covering and often don't provide the desired colours if they are not initially underlaid with white.</p>
	<p>Since December 13, 2014 the rules of EU-regulation 1169/2011 concerning the Food Information Regulation (LMIV) have to be observed. This regulation includes the ingredients list, the labeling of allergens, the product name (within the visual area), the net quantity (within the visual area), the best before date as well as the full name and address of the distributor. All legal requirements have to be printed clearly and readably with a minimum font size of <b>1,2 mm related to the letter "x"</b>. As soon as the maximum surface area of the packaging is less than 80 cm², the <b>minimum font size is 0,9 mm</b>. Concerning smallest packaging - that is less than 10 cm² for the maximum surface area - only the most important legal requirements (such as the product name, the net quantity, the best before date) have to be mentioned - however in the font size of 0,9 mm related to the small x.</p>
